

Commonly Asked Questions for Admission Requirements – UniSIM Full-time Programmes

POLYTECHNIC DIPLOMA FROM SINGAPORE

- 1) **Does my Diploma have to be from a relevant course of study? (eg. Must I have a Diploma in Accountancy in order to apply for the Accountancy programme?)**

No, the diploma obtained does not need to be from a relevant course of study.

- 2) **If my Diploma is from a relevant course of study, can I obtain any credit exemptions for the relevant university courses? (eg. I have previously completed a Diploma in Accountancy from a polytechnic in Singapore.)**

UniSIM does not give credit exemptions based on previous academic results. Instead, credit waivers of up to 10 credit units (cu) can be obtained based on excellent polytechnic results (GPA \geq 3.5).

Students may also take Challenge Examinations (CEX) for specified Level 1 courses. If you pass these exams, you are granted recognition, thus you do not need to read the courses.

More details on the Challenge Examinations can be found [here](#).

- 3) **I have not yet received my last semester's results or official Polytechnic transcript. Can I still apply?**

Yes, you can still apply for admission using your first five semesters of Polytechnic results and your GCE 'O' Level results. You are required to submit your final results/transcript as soon as they are available, as proof of successful completion of your diploma course.
